

Jt. Institute 08/03/2026

Funder: Joint Institute for Wood Products Innovation

Program: Grant Program

2026-07-17

Project Summary

Planscape, One Water Econ, and 3point.xyz will work together to create an economic and project valuation and prioritization component for Planscape software, which will be freely available to any user. 3point.xyz will lead and manage the project. To test out the new component, we will use the Eldorado National Forest as the landscape, incorporating work in progress by the Healthy Eldorado Landscape Partnership. Details are described in the scope and deliverables.

Scope

A. Purpose

Critical need to create prioritized project pipelines that include biomass and forest product utilization coupled with forest health resilience treatments.

1. Wood/biomass utilization expansion

2. Impact

B. Background

1. Wood products innovation

Vance Russell has worked on wood product innovation for more than 15 years, starting as the California Director for the National Forest Foundation. In addition to supporting wood product and community-based forestry projects across the state, he led the first biomass and mass timber analysis in the state, working with The Beck Group. He has participated in the state's Biomass Work Group, funded and supported numerous biomass and wood product projects from their outset, including Camptonville Community Partnership, Mid Klamath Watershed Council, the Mokelumne Avoided Cost Analysis, Cabin Creek, Sagehen Reserve Forest Resilience Project, and Loyalton projects, among others. More recently, he founded and co-led the Forest Business Alliance (<https://>

forestbusinessalliance.org), which works with Tribal, nonprofit, and business partners across the state to develop capacity and innovation in forest product projects at scale.

2. Previous projects

For more detail on previous projects completed by 3point.xyz, see <https://3point.xyz/vr-cv/projects>. Testimonials from previous clients are at the testimonials link at the same site.

C. Key Staff

A brief description of staff and roles is provided below, with more detail on experience and bios in the qualifications section

1. Key personnel/role
2. Relevant experience related to project activities
3. Commitments of time

D. Alignment

1. How the project aligns with goals of the Institute including:
 - a. (didn't include first one that focuses on near term market ready wood) contributes to a robust CA wood products industry and make CA more competitive place to conduct forest sector business.
 - b. creates financial incentives for industries to develop innovative ways to process wood and support growth of forest sector

E. Deliverables and timeline

Described under tasks/deliverables below and in the timeline section.

F. Impact

G. Readiness

Scope of Work

1. Scoping & Data

2. Analysis

3. Results

Budget

Item	Cost/Unit	Units	Total
1. Scoping & Data			
1a. Initial meeting	0	1.0	0
1b. Data collection/cleaning	0	1.0	0
2. Analysis			
2a. Forest data analysis & valuation	0	1.0	0
2b. Economic data analysis & valuation	0	1.0	0
3. Results			
3a. Quarterly reports	0	1.0	0
3b. Jt. Institute presentations	0	1.0	0
3c. Draft report	0	1.0	0
3d. Final report	0	1.0	0
Subtotal			\$0
Indirect (15.0%)			0
Total			\$0

Qualifications

Vance Russell has nearly 40 years of experience working in forest science & management, rewilding, biodiversity conservation, agricultural landscapes, restoration, and natural resources management. He is a conservation consultant, principal and

owner of 3point.xyz. Vance works for various non-profit, state/federal agencies, and private businesses. Vance was the California Director of Programs for the National Forest Foundation, where he managed, led, and funded community forestry projects. Before joining the National Forest Foundation, he was director of Audubon California's Landowner Stewardship Program, working with farmers and ranchers to restore habitat compatible with existing agricultural operations. He managed the 7,800-acre Bobcat Ranch and 3,000-acre Mayacamas Mountains Reserve in Yolo and Sonoma Counties, California. Vance is the former Board Chair of Groundswell International, is a trustee for the South Downs National Park Trust, and serves on the Rewilding Leadership Council for the Rewilding Institute. Vance received his M.S. degree in Forest Science and Natural Resources Management from Cornell University and a B.A. in Biology from the College of Wooster.

Jeff Odefey is the Director of Water Policy for One Water Econ. He leads multi-disciplinary efforts to promote integrated management of water resources through progressive regulation, sustainable financing, market-based mechanisms, and policy reforms. His work focuses on green infrastructure, water conservation, and integrated water management as pathways to preserve and protect healthy waters and communities. Many of his efforts have fostered resilient water management policies and programs in the Lower Colorado River Basin. His experience includes stints as a Waterkeeper Alliance and Hudson Riverkeeper staff attorney. Jeffrey holds a B.A. in English and Art History from the University of Colorado, an M.A. from the University of Montana, and a magna cum laude graduate of the Pace University School of Law.

Carrie Levine is the Spatial Informatics Group Executive Director. She works in collaboration with academic, government, and industry partners to develop short-term and long-term wildfire prediction models for the US. We develop operational and strategic information, tools, and interactive maps to understand changing wildfire risks and implement effective protection and adaptation measures.
